Parther Evidence-Great Excitement and Panic amongst the Calomel Doctors-Disestrous consequences of the use of Min-Disease, in the forms of Ague, Bilious, Congestice and Typicus Fevers-Read and be convinced!

Vas Bunes, Ark, April 15, 1848. Dn. Bn. soc - Dehr Sir: During the past four Fever were very prevalent and often fatal in this section of country. Our wor-thy none-such physicians, pasted up with pride and vain conceit, persisted in their arriguated practice with that universal panacea, caloniel, with such unbounded success, that one or two, panic-struck, scampered off and left their patients with nature and her ineffectual efforts to repair the mischief they had done. In one family, four cases resulted in death, in the short space of four days ; in some case three or four days after the exhibition of calomel, great prostration, tympanitic con-dition of the abdomen, and perforation of the bowels were the result of this heroic treatment, and to prove it so to their weeping feiends, a post morten examination would reveal the fact. After finding their practice altogether ineffectual, they same to the wise conclusion to give no medicine at all, but continue to visit their patients, tention of the community.

EVERETT & ASHBURY. poultice of the same applied to the bowels; when this failed, with sage look, and little faith, & hearts—full of apprehension, they yould confers to their friends their full cor fidence in the application of blisters from head to foot-you may guess the result.

In this dilemma and universal consternation, one of your travelling agents passed through our neighborhood, and made liberal deposites of your vegetable medicines, and distributed pamphilets, and the "Sun. o shed a genial and benignart light upon this benighted, and apparently devo-ted land. The manna sent to the Chilren of Israel, in the wilderness, was not halled with more hearty thanks than were your health-restoring Pills in this awful crisis. The people were prepared to receive them, or any thing that promised them relief from their apparently impending fate. I have watched their progress, and the effects they produced in hundreds of cases and am happy to give my feeble testimony to their entire and triumphant fliency, in restoring health in a few days, in every instance, when they have been taken in time, and in strict accordance to directions. Some of our physicians, whose love of truth and philanthropy trinumbed over projudices and preconceived theories, have cheerfully abandoned their calomel and lancet, and recommended your pills in all cases of bilious, intermit tent, remittent, congestive and typhus fevers; and they freely acknowledge that they are almost a specific in all these diseases. Your travelling agent is anxiously looked for again, as many of your agents are out of pills, and the sickly sea-

on is approaching.

With best wishes for your success,
I am truly yours.
